

I'm not robot!

Picsart Gold membership with a free trial, limited to one per Apple account. Once the trial is over, you'll be charged a nominal standard rate. Your Gold subscription will automatically renew unless auto-renew is turned off at least 24 hours before the end of the current period. If your subscription is subject to any promotional discount, the discount will expire upon the end of the current period & you'll be charged the standard rate upon renewal. Go to your Apple account to manage your membership & to turn auto-renew off. Your Apple account will be charged when the purchase is confirmed. Terms and conditions: Ads: Aug 13, 2022 Version 20.4.3 Bugs are so misunderstood. It's estimated that there are 1.4 billion of them for every person on Earth. And it turns out, we actually need most of them. Not the bugs we've squashed to make this update though. Those bugs weren't so nice. Sorry about that. We'll do better. Happy creating! Picsart is a great social media platform and editing app! For editing it has everything from removing stuff from the picture to adding realistic makeup! Picsart is a great community over and the best of it. I'm on it 24/7 and I have a few suggestions to make it better! 1. Make it so you can pin certain posts, for example, on tik tok you can pin certain posts and it stays at the top. Now, you probably get this sort of thing. 2. Bring DMs back. Now, I haven't been on Picsart long enough for the DMs but, I have seen comments in your posts telling you this and I think you should give the community a yes or a no to this. If no then tell us why so we can understand. 3. Let people without a valid email comment and follow. I used my email for a account a long time ago but, I don't know how to log into that account and I'm not making another email for only Picsart. Please, this is extremely frustrating. I have to create a whole post to respond to someone and so all my followers get a notification for only that. 4. Have an option to notify all of your followers or just to notify certain people that I have posted a certain post, for ex) when you're about to press post there should be something under the reply/on/off and all that (notify all) and if they turn it off there should be a box where it can toggle/your followers that you want to notify. This is a great app that is amazing. 10/10 recommended. Hey there, thanks for reaching out! We're always working to incorporate Creator feedback and improve Picsart. We'll make sure to pass your feedback along for future planning. I've never written a single review for an app but picsart just needed it. It's such a stupid app like you have to pay for an and I'm like No why would I do that so I use what I can and it's so fun it makes making things complicated and like a game like oh can I do this? No I can't great but how can I use these you to be able to copy that oh I actually have no idea let's just think of something else ya but I just have fun on picsart bec everything I make is so stupid it works perfectly BUT the only thing that upsets me is after you put in a new image and restore erase it what I mean once you're done YOU CANT EDIT IT AFTER YOU HAVE TO RESTART AND I DON'T NOTICE WHAT'S WRONG UNTIL I THINK IT'S DONE AND PRESS THE CHECK YOU'VE MADE NO SHED TEARS FR (as you have!) but internally you have. Fix it that feature and I'm actually your No. 1 fan so I deserve free services or free to use and probably still won't. Guys I love picsart I just have fun I giggle and kick my feet especially in bed I just put my face on top of it so I could be hugging veins true love **❤️** (That's me and him I LOVE PICSART it came out so bad guys I'm telling you I didn't realize I cut my face out to be too small UNTIL AFTER I FINISHED this is a real serious problem guys. Pls fix it HI there! We appreciate your feedback and understand your concern. Picsart will always offer a robust, free version of the app with access to hundreds of free features and millions of pieces of free to-edit content that you can access without a subscription. We would like to take care of the mentioned inconveniences you've faced during the editing process. Can you please send us an email at support@picsart.com with the subject line "App Store Review"? Our team will investigate and work on a fix for you. I started using Picsart and I fell in love with it. I use it for all of my editing. I find myself scrolling and looking at filters for what seems like hours. I like to participate in the challenges. But there is one problem... lagging. Lagging has been present recently but right now I'm creating an aesthetic bored through the app and it glitched out and lags and often even kicks me off the app. Sometimes I have to wait a couple of minutes for it to allow me to move a photo around since it's lagging so much. I know it isn't my phone because I don't have problems with any other apps and I have Picsart updated. In fact I had Picsart open while in another app and it was glitching out and lagging and kept crashing until I closed out Picsart. I also had my camera and Picsart open at the same time and it wouldn't even let me access my camera until I closed Picsart out. It was just a black screen. And sometimes the lagging and glitching gets to the point where when I try to turn off my phone, it glitches and lags out also. When I hit the off button, it's delayed for a few seconds and then I try to turn it back on, it's also delayed for a couple of seconds. I really enjoy this app, but the lagging and glitching and crashing is very annoying and sometimes makes me start all over again on my projects once it finally loads. I hope this gets fixed at some point, and if you read my review, thank you. Thanks for the feedback - we'd love to look into this for you.
